FOREWORD

The Library of Congress embarked on this Manchurian bibliography in continuation of its program of publishing area bibliographies based on its extensive resources. In this case, the compilers were faced with conditions which were, to say the least, unusual.

Manchuria has seen its most accelerated development during the years of Japanese hegemony in the area. This development was intimately tied to a much broader program of Japanese expansion. The attendant economic planning and controls were held in tight rein by Japanese officials and administrators. The primary literature which records this history is therefore largely in the Japanese language. Much of it has only recently become available in this country and thousands of volumes still have not been brought under adequate bibliographical control.

The current need for basic information about Manchuria, information contained in primary and frequently secret documents of its Japanese administration, cannot await the appropriate but time-consuming process of classification and cataloging. Beyond the fact that these materials were not under the type of control desirable before they are included within the traditional bibliographic framework, lay the consideration that they were in Japanese and therefore posed what may be a considerable barrier to routine exploitation by the research analyst and scholar.

For these reasons the Library secured the assistance of a competent student of Manchurian affairs to assume the primary responsibility for preparing a guide to these resources. He has screened not only the materials in Japanese but also those in the Chinese and other languages.

Any comments or suggestions based on the use of this bibliography will be gratefully received and will be given serious consideration when future area bibliographies are undertaken.

INTRODUCTION

This bibliography provides a very selective coverage of the available literature on Manchuria. The initial roundup of pertinent titles garnered from a screening of the Main Catalog in the Library of Congress as well as from other conventional bibliographic tools at the disposal of the staff of the General Reference and Bibliography Division provided more than two thousand titles in the European languages alone. Available Japanese works published in or about Manchuria number well over ten thousand.

The subject scope of the bibliography has been made as broad as possible, while an emphasis has been maintained on the economic conditions and developments in Manchuria. This will explain the restricted coverage of cultural subjects and the exclusion of references to works on the Manchu language and literature.

Although works in Japanese and Chinese as well as in English, French, Russian, and other European languages have been included, the largest concentration has been on Japanese publications. This stems from the fact that the most extensive study of Manchuria was made by the Japanese who, for over forty years, spared no efforts to survey the resources of this area. A part of this research, conducted primarily by the Research Department of the South Manchuria Railway Company, was of a confidential character and many of the resulting publications still bear Japanese security classification. Needless to say, this material has in the past been in large measure unavailable to Western scholars who, by and large, have had access only to those Japanese publications which represented the official Japanese point of view.

Complimenting these important Japanese sources are the catalogs of classified publications (see item 57) which permit an understanding of the character and scope of confidential research conducted by the Japanese in Manchuria.

Since the major part of this Japanese collection was and remains uncataloged, the preliminary work leading to this compilation consisted of sorting the materials, classifying them within broad subject categories, and selecting the most important works for final inclusion. Thus, although only a fraction of the available holdings have been included in this list, additional indication of pertinent materials has been provided through brief references contained in the individual annotations as well as through notes at the end of many of the sections in the bibliography.

INTRODUCTION

Aside from these works, listed or not in the present bibliography, the Library of Congress maintains a considerable collection of Japanese documents on microfilm, many of them important to Manchurian studies in terms of their reference to the "Manchurian Incident," Japanese policy in Manchuria, and diplomatic correspondence between the Foreign Ministry in Tokyo and Japanese consular or diplomatic agents in Manchuria. Preparation of a catalog of this microfilm collection is currently in progress.

The authenticity and completeness of Japanese language materials bearing on Manchuria has made it necessary to provide in this bibliography a greater representation of those materials than some of its users might expect. The selection, however, has been much more rigorous than in the case of Western language materials which, despite their lesser value for authoritative study, nevertheless are recognized to have a wider reader usability.

As a rule, general works and maps relating to China, Japan, and the Far East have been omitted. Maps of Manchuria, including general maps of the entire area, special subject maps conveying statistical and other information in terms of geographic distribution, and maps of provinces, cities, and towns are available in the Map Division.

The necessary limitations of this bibliography made it undesirable to include references to particular articles in Western language periodical literature. It was felt that a contribution of longer duration could be provided through a listing of the periodicals themselves which more or less frequently contain articles on Manchuria. In instances of particular importance, examples of the kind of articles published have been included with the citation to the given periodical. Of Japanese periodicals, only those published in Manchuria and a few additional ones of special significance were selected for inclusion. These have been cited in their respective subject categories. To list all Japanese periodicals containing material on Manchuria would have meant listing virtually all periodicals published in Japan. More inclusive reference to Japanese periodicals may be obtained through the files of the Japanese Section of the Orientalia Division, Library of Congress.

INTRODUCTION

The bibliography is arranged in a subject classification and within each subject is further subdivided into two groups: (1) works in European languages, and (2) works in Far Eastern languages. Since some of the latter group contain English summaries or appear in bilingual editions (as indicated in the respective annotations) the attention of the reader not familiar with Chinese or Japanese is also invited to this group.

Translations of titles of non-English works have not been provided. However, brief descriptive annotations which contain indication of the contents of these works or give information about the author or the significance of the particular study have been added. The terms "Secret" or "Confidential" which follow many of the annotations to Japanese language items were inserted as an indication that they were previously unavailable. The terms themselves are equivalent rather than literal translations of the Japanese security classification. For example: "Gokuhi" or "Tokuhi" - literally Top Secret - were rendered Secret; "Hi" and "Gunji Himitsu" - literally Secret - were rendered Confidential.

Each entry is accompanied either by the Library of Congress call number or by an appropriate symbol showing location of the material.

A combined author and subject index has been appended. Titles not attributable to an author have also been indexed. Use of the bibliography will be further facilitated by reference to the map facing the title page, showing political boundaries of Manchuria in the period preceding Japanese occupation, the State of Manchukuo, and the new administrative divisions under the present Communist regime.

The preparation of this bibliography has been enormously aided by the extensive cooperation which the compiler has received both from within and from outside the Library of Congress. The Army Medical Library helped with specific citations to works in the field of medicine and health. The Bureau of Railway Economics Library made available a considerable number of references to transportation. Acknowledgment must be made of the contribution by the staff of the Japanese and Chinese Sections of the Orientalia Division who prepared the bibliographic entries in their respective

INTRODUCTION

languages. Particular mention, however, should go to Andrew Kuroda, of the Japanese Section, who helped in selecting the Japanese works for inclusion; to John T. Dorosh, Curator of the Slavic Room, who assisted in providing Russian language materials; to Arch C. Gerlach, Chief of the Map Division, who contributed the frontispiece; and to Helen Dudenbostel Jones, Bibliographer, General Reference and Bibliography Division, who rendered valuable advice and assisted in almost all phases of preparation of this bibliography.

SUMMARY OF SIGNIFICANT EVENTS

Manchuria

1894-1895	Sino-Japanese War.
1895	Treaty of Shimonoseki. Triple Intervention of Russia, Germany, and France. Japan obliged to announce retrocession of Liaotung Peninsula.
1898	Russia obtains twenty-five year lease of the Liaotung Peninsula.
1900	Boxer Rebellion and Russian occupation.
1904-1905	Russo-Japanese War.
1905	Treaty of Portsmouth. Russia transferred to Japan the lease of Port Arthur, Dairen and adjacent territory as well as the Railway between Changchun and Port Arthur.
1931	Manchurian Incident.
1932	League of Nations Inquiry. Establishment of Manchukuo.
1933	Jehol Province incorporated into Manchuria.
1945	Soviet occupation.
1945-1948	Chinese civil war.
1949	Establishment of People's Republic.

Kwantung Leased Territory (Liaotung Peninsula)

1898-1905	Russia
1906-1945	Japan
1945-	U.S.S.R.

Chinese Eastern Railway

1898-1905	Russia
1906-1935	Russia - North of Changchun Japan - South of Changchun (renamed South Manchuria Railway)
1935-1945	Japan and Manchukuo (sale of the northern part by U.S.S.R. in 1935)
1945-	Joint Sino-Soviet management

GEOGRAPHY

159 U.S. Library of Congress. Orientalia Division. A catalog of Chinese local histories in the Library of Congress, by CHU Shih Chia. Washington, U.S. Govt. Print. Off., 1942. 552 p.

Z881.U5 1942
Z3107.A2U57 1942
OC C61.192/C47

Text in Chinese. L.C. has almost 3,000 local histories of which 70 are on Liaoning Province, 12 on Kirin Province, 10 on Heilungkiang Province, and 4 on Jehol. These local histories contain description of political, economic, social, and cultural conditions in each province and county divided into the following sections: history; geography; politics and government, including military establishments, and record of political events; economic conditions, including population, taxation, agriculture, natural resources, and commerce; social conditions, including customs, dialects, and religion; and culture, including biographies, art, archaeology, literature, and description of places of historical interest.

NOTE: In addition the Japanese Section has a made up set of 32 volumes containing chiefly material on Manchuria (150 books published mainly during 1940-1944). This collection covers almost all political, economic, social, and cultural aspects of life in Manchuria.

INDUSTRY

536 Japan Economic Federation. The heavy industry of Manchoukuo; present conditions of the exploitation of natural resources in Manchoukuo. Tokyo, 1940. 83 p. map, tables. (East Asia economic intelligence series, no. 3, January, 1940) HC411.E3 no. 3

Includes information on each branch of the mining industry and on mineral resources as well as a history of the activities of the Manchuria Industrial Development Corporation.

537 Pauley, Edwin W. Report on Japanese assets in Manchuria to the President of the United States, July 1946, by Edwin W. Pauley, Ambassador of the United States and personal representative of the President on reparations. [Washington, U.S. Govt. Print. Off., 1946] 1 v. illus., maps. HC428.M3P3

Objectives of the 1946 Pauley Mission were: "to survey Japanese assets subject to reparations; to ascertain the present productive capacity of industry; to estimate what immediate reparations removals from Japan could be utilized to improve or rehabilitate that industry; and to prove or disprove reports that crippling removals had been made from that area." Results of investigation of the industries and natural resources with statistical information and photographs, many showing removal of equipment during Soviet occupation.

L.C. also has album of approximately 100 captioned photographs by Capt. Marlin Fenical, taken on the Pauley mission, with a few photos of Pauley and members of the mission; and some (photos furnished by Chinese authorities) of Soviet soldiers in process of removing equipment, etc. P & P

538 Schumpeter, Elizabeth B., ed. The industrialization of Japan and Manchuko, 1930-1940: population, raw materials and industry. New York, Macmillan Co., 1940. xxviii, 944 p. tables, diagr. HC462.S36

The editor's 3 chapters on food supply and agricultural raw materials, chemical resources, and mineral resources of the Japanese Empire and Manchoukuo, p. 271-474, contain the major part of the information pertaining specifically to Manchuria. Index. Bibliographical footnotes.

L.C. also has a Japanese translation. OJ

806 North Manchurian Plague Prevention Service. Reports (1914-17, 1925/26, 1927/28) ed. by Lien-teh WU. Peking, "Peking Gazette" Press, 1917-1928. 3 v. illus., plates, maps, tables, diagrs. RC179.C6M3

Reprinted in part from various periodicals. The 1914-17 volume contains both English and Chinese while the later reports are issued in separate English and Chinese editions. L.C. has 1914-1917, 1925-26 (v. 5), 1927-28 (v. 6). (DSG has 1911-1913. Cambridge University Press, 1914. 187 p. 23 pl.) (MiU has 1911-1922. Tientsin Press, 1914-1922. 3 v.) The establishment of the Service in October 1912 resulted from a recommendation of the International Plague Conference held at Mukden, Apr. 1911 (see item 804). In addition to summaries of the annual reports, these volumes contain articles concerning investigations in plague and related diseases, health surveys, hospital reports, tabular lists of patients, and accounts of scientific expeditions by the staff. Bibliographies.

In 1934 the Service issued Manchurian Plague Prevention Service Memorial Volume, 1912-1932, edited by Lien-teh WU (Shanghai, National Quarantine Service. 469 p. illus. RC179.M3N6) which brought together the best articles that appeared in the 7 volumes of the Reports, the last of which was published in 1931. "A short history of the...Service" is included with a "List of important publications of the...Service."

807 U.S. Bureau of Medicine and Surgery. Epidemiology of the diseases of naval importance in Manchuria, prepared by Tsai-yu HSIAO, Entomologist, Division of Preventive Medicine. Navmed 958. Washington, D.C., Bureau of Medicine and Surgery, Navy Dept. 1946. 54 p. tables. Processed. RA650.7.M3U5 1946

Summary of literature concerning infectious diseases with emphasis on the epidemiology of diseases presenting a control problem different from that in other areas. Extensive bibliography, p. 37-50, includes references to Japanese and western language publications.
